

# User guide

**FanStatic**

-Project: TocTic™-

# This guide has been created in order to advise new users how to operate on the TocTic™ application.

## 1. Opening the website

- Hence only mobile availability user is asked to open application only on the phone web browser,

## 2. Login/Register

- To progress further, user is asked to create an account. When all of the fields are filled in (*First name, Second name, Username, Password, E-mail, Age and Gender*) he can then finalize process of registration and move to the login page. There he puts a username and password and is redirected to the main page.

## 3. Navigation bar/Footer

-  Main page
-  Search channel
-  Add post and Add channel
-  Notifications
-  Profile page

## 4. Main page

- Newly created accounts are presented with recommended posts that include username and channel that they belong to,
- When user is following channels, posts will be displayed from the most to the least popular,
- Content of the channels can be filtered by choosing one from the scroll bar on top of the page where all of the followed channels are displayed. User will then see only posts that are made on this specific channel.

## 5. Post

- At the top, username and profile picture of the creator is displayed,
- Below user can read the description that creator has made,
- Main content of the post can be **image, video, gif or text**,

- User can like the post by clicking the **thumbs-up icon**. It's up to his choice how to react to the posted content. He can choose between:
  - Thumbs-up/Like,
  - Thinking face,
  - Laughing face,
  - Angry face,
  - Sad face,
- To comment a post user will need to click the icon on the right side of the **thumbs-up**. He will be then presented with a menu where he can read all of the previous users' comments and submit his by typing something in the text field and clicking *Add comment* button.

## 6. Search page

- Allows user to find their desired channel by displaying them after typing their name in the bar. They are then shown in a list order as a pop-up.

## 7. Add post

- In order to create a new post user needs to follow that specific channel. Then and only then can he start with the creation. To do that he shall put intended channel's name into the *Channel name* bar and choose type of the post:
  - Photo,
  - Video,
  - Text,
- He then clicks *Browse* and puts wished content with additional description\*
- After filling all the fields, he may then finish this process.

## 8. Add channel

- To create a channel, user will then proceed to put the channel name and channel description in the proper fields,
- By click a drop down menu below he can choose what type of posts can be posted on that channel,
- After that he needs to add two images, one for the main picture of that channel and another one – for the background cover,

\* Layout displayed on the website may vary due to the chosen type of content.

- When all of those requirements are met, he can click button *Enter* and finish the creation.

## 9. Notification

- For every post created a notification is shown,
- Notifications only appear when user is following a specific channel,
- Notifications are stacked from the newest to the oldest, until the 15<sup>th</sup>. 16<sup>th</sup> will be deleted automatically.

## 10. Profile page

- This page is visible only for the owner,
- On top of the page user can see his profile picture and username,
- When pressing *Choose photo* user can change his profile picture by uploading a new one,
- In the field below, user has the possibility to change his password,
- When button *Delete account* is pressed, a message will be displayed. If user decides to continue this process, he should follow the instructions and press *Delete account* button once again,
- To log out of the account user needs to press *Logout* button.
